

Call For Patrons / Exhibitors

The MeMeA Symposium deals with all the aspects of interactions among the worlds of the instrumentation and measurement, bio-engineering, material science, chemical and biological measurements, and the medical field. The symposium enables researchers, doctors and technicians to exchange ideas and information, make connections and collaborations and update innovation on health care systems and diagnostics in medicine.

MeMeA features a day for tutorials and three days for presentation of papers in technical sessions and poster sessions, as well as invited lectures.

The MeMeA Symposium is held every year in a different region of the world and in 2017 it will take place in Rochester, MN, USA. We believe that this conference is strategic to promote your company.
